

## Dinner with our Medical Director

a support resource for caregivers

Thursday, March 26, 2015  
6:00pm – 8:00pm

As a caregiver of someone with memory impairment, seeing the following signs in a loved one can be a cause for concern:

- Changes in behavior
- Cognitive or physical decline
- Wandering
- Decline in safety awareness
- Poor decision making
- Sleep pattern changes
- Medication side effects

Having a supportive, knowledgeable resource can make a difference in caring for your loved one. Silverado Calabasas is hosting an informative dinner to give caregivers the opportunity to obtain insight and advice from an expert. Our Medical Director, David Stern, MD, will share his expertise and address your questions in an open dialogue forum to help you better understand the different types of dementia and the effects of each.

Caregivers who attend will receive complimentary care for their loved one during the event, including dinner and engagement activities.

**RSVP to Mike Duran**  
**by Tuesday, March 24, 2015**  
**Call (818) 222-1000 or**
